-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Spatz et al. US 5,660,289 in view of Graham et al. US 6,253,940.

Spatz '289 teaches a closure for bottles comprising a plastic collar/closure cap, a first screw thread (23), a second thread on a container neck (not shown; inherently present), a tamper evident ring (9), flexible blocking members (37) projecting upwardly and inwardly after application, as noted in column 7, lines 3-7, and a plurality of ring segments separated by breakable bridges (49) located in the vicinity of the ring segments.

The reference fails to explicitly show a blocking rib on the container neck, and, an opening between connecting bodies.

Graham '940 shows how a closure such as that of Spatz '289 requires a blocking rib on a container neck, and such is inherently present in Spatz '289 in order for the closure to properly function. Graham '940 also teaches gaps (60) inbetween connecting members, which also correspond to drains (52) which permit drainage of liquid in wet-finish applications.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the closure of Spatz '289, providing the gaps inbetween the connecting bridges, in addition to drain openings on the base of the tamper-evident ring, as taught by Graham '940, motivated

Art Unit: 3781

by the benefit of reducing the overall amount of material used in forming the closure cap, and to permit drainage of liquid in wet-finish applications.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: See attached PTO-892 citing relevant references.
